PROFESSIONAL SUMMARY

Frontend Engineer with 3+ years of experience building scalable and responsive web applications using React.js, Next.js, and TypeScript. Skilled in developing reusable UI components, state management, REST API integration, and performance optimization. Experienced in delivering production-ready solutions in Agile environments and collaborating with cross-functional teams.

TECHNICAL SKILLS

- Languages:** JavaScript (ES6+), TypeScript.
- Frontend:** React.js, Next.js, React Native, Vue.js, Redux Toolkit, RTK Query, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI (MUI), Responsive Design.
- Backend:** Node.js, Express.js.
- Databases:** MongoDB, MySQL, SQLite, Firebase.
- API & Authentication:** REST APIs, JWT Authentication, API Integration, Razorpay, Stripe.
- Performance Optimization:** Code Splitting, Lazy Loading, Memoization, Bundle Optimization, Rendering Optimization.
- Testing & Tools:** Jest, Git, GitHub, WebStorm, VS Code, Vite, Webpack, CI/CD Pipelines.
- Cloud & Services:** AWS, Firebase, GCP.

WORK EXPERIENCE

Software Development Engineer (SDE I)

iTCart Pvt Ltd | Bangalore, India

Aug 2025 - Present

- Developed scalable frontend applications using React.js and TypeScript following modular and feature-based architecture principles.
- Built and maintained reusable UI components to ensure design consistency and accelerate feature development across multiple modules.
- Integrated REST APIs with robust error handling, caching strategies, and optimized state management.
- Implemented responsive user interfaces using Tailwind CSS, ensuring seamless user experiences across desktop, tablet, and mobile devices.
- Improved application maintainability through TypeScript adoption, reusable utility functions, and standardized coding practices.
- Optimized rendering performance using **React hooks**, **memoization**, and efficient component lifecycle handling.
- Collaborated with backend developers, designers, and product teams to deliver production-ready features within Agile development cycles.
- Contributed to frontend architecture decisions, API service organization, and reusable component standards.

Full Stack Developer

TechNetME | Dubai (Remote)

Jun 2024 – Jun 2025

- Developed and maintained the company website using Next.js, delivering a fast, SEO-friendly, and responsive user experience.
- Built reusable UI components and scalable frontend architecture to improve maintainability and development efficiency.
- Implemented server-side API routes using Next.js for contact forms, customer inquiries, and email communication workflows.
- Optimized website performance through image optimization, code splitting, and efficient rendering strategies.

- Developed cross-platform mobile applications using React Native, delivering responsive and user-friendly mobile experiences.
- Integrated Firebase Authentication and secure user management functionality.
- Built backend services using Express.js and MongoDB to support application workflows and business requirements.
- Implemented SQLite and Firebase solutions for local and cloud-based data storage.
- Optimized application performance through efficient state management and rendering improvements.
- Managed deployment and release processes for both Google Play Store and Apple App Store.
- Collaborated with cross-functional teams to ensure application quality, stability, and performance.

PROJECTS

Workforce360 LMS (Learning Management System)

Tech Stack: React.js, TypeScript, Redux Toolkit, RTK Query, Tailwind CSS

- Led frontend development of a role-based Learning Management System supporting Admin, Instructor, and Learner workflows.
- Designed and implemented a scalable feature-based frontend architecture for long-term maintainability.
- Integrated REST APIs using RTK Query with authentication, caching, loading states, and centralized error handling.
- Developed course management, learning paths, user management, analytics dashboards, and reporting modules.
- Implemented responsive user interfaces ensuring consistent experiences across devices and screen sizes.

TechNetME Website

Tech Stack: Next.js, TypeScript, Tailwind CSS

- Developed the company website using Next.js with focus on performance, SEO, and responsive design.
- Built reusable and scalable frontend components to improve maintainability.
- Implemented API routes for handling customer inquiries and contact form submissions.
- Optimized website performance using image optimization and modern frontend best practices.
- Delivered a mobile-friendly and cross-browser compatible user experience.

Car Washer Mobile Application

Tech Stack: React Native, Firebase, SQLite, Razorpay

- Developed a mobile application enabling users to schedule and manage on-demand car washing services.
- Implemented authentication using Firebase Authentication.
- Integrated Razorpay payment gateway for secure online transactions.

EDUCATION

Bachelor of Technology (Information Technology)

North-Eastern Hill University (NEHU), Shillong, Meghalaya

CGPA: 8.64

Graduated: 2023
